**Replacement  
and Upgrade Program**

## Replacement of older lid foil printers

Lid foil printers play a key role regarding the fulfillment of laws and directives. As service warranties are due to expire on November 29, 2019, we recommend that you consider a replacement.

### Affected systems

CSAT 6335	CSAT 6135	CSAT 6235	HAPA Digiprint 730/16
CSAT 6335-2 Color	CSAT 6135-2 Color	CSAT 6030	HAPA Digiprint 730/29

**Our recommendation:** The modern, digital, single-color printer WebJet M/L from the global market leader HAPA

### Your benefits:

- Faster throughput times
- Suitable for graphics and variable texts
- Seamless integration of the existing printing system
- Top quality for all types of print applications
- Digital interfaces for the simplest system integration

# HIGH PRODUCTIVITY WITHOUT UNPLANNED DOWNTIMES

Uhlmann replacement and upgrade services – cost-efficient and optimally tailored to your requirements – mean state-of-the-art packaging lines offering reliable performance. Comprehensive, one-stop support – covering installation, commissioning, and validation – is a matter of course.

You benefit from high machine availability, process and production reliability, a longer service life, improved cost effectiveness, and extended maintenance accessibility.

We currently recommend the replacement of older lid foil printers as well as upgrades for various camera systems – at **attractive special rates** (valid until September 30, 2019).

## Upgrading of outdated camera systems

Regular maintenance keeps your camera systems in working order and ensures reliable blister inspection. As service warranties are due to expire on November 29, 2019, we recommend that you consider an upgrade.

### Affected systems

Affected systems	Our upgrade recommendation
PacVision	VisioChrom (WIN 7)
PacVision OCR, Datemark, VisioRead (NT), VisioRead Color (NT)	VisioRead (WIN 7)
PacVision CV, VisioPan, ColorVision, ColorVision CV, VisioChrom (NT), VisioChrom CV (NT)	VisioChrom CV (WIN 7)

### Yours benefits:

- Optimization of the inspection performance
- Partial adoption of existing inspection tasks and of all formats without renewed teaching
- Current embedded operating system for long-term operation
- Seamless integration of the existing camera system
- Additional camera tools for more accurate and reliable recognition
- No PLC modification necessary
