CARTONERS

EXPERTS FOR DIVERSE PRODUCTS IN CARTONS

Uhlmann cartoners excel in terms of cost-efficiency, precision, and process reliability, and this proficiency is not restricted to packaging blisters in cartons. They are equally competent in handling bottles, pens, or pillow packs with product-related utensils, all types of leaflets, and cartons of critical quality at a consistently high output. Intermittent or continuous motion cartoners are available depending on your requirements.

These can be integrated into a line or used as standalone machines. Standard types of closure are possible with each of our cartoners: these include tuck-in and hot-melt closure, the use of a fourth flap, side loading with top opening, as well as tamper-evident options. All cartoners can be fitted with marking systems or Track & Trace functions, and can be linked to appropriate labeling systems.

PRACTICE-ORIENTED AND PRODUCTIVE

C 2155
An intermittent motion cartoner. Easy to operate and suitable for small to medium batches of a wide range of solid and liquid dose products: bottles, vials, wallets, small plastic containers, ampoules, syringe blisters, inhalers, pillow packs, and medical devices.

C 2156/C 2206
Two continuous motion, 6”-pitch cartoners for the highly flexible packaging of a wide range of products in small and medium batches. Both models are suitable for all carton qualities.

C 2305/C 2504
Continuous motion cartoners offering a consistently high output of 300 and 500 cartons per minute respectively. Ideal for large batches. Easy to operate. Changeovers to a new format take a maximum of 15 minutes.

## ALL OPTIONS: TYPES OF CLOSURE

1. **Tuck-in closure with airplane flaps**
2. **Tuck-in closure with reversed flaps**
3. **Combination tuck-in and hot-melt closure**
4. **Double-sided hot-melt closure**
5. **Hot-melt closure with fourth flap – reclosable**
